SYSTEM KNOWLEDGE

ABOUT

I started my work life in the movie industry navigating from camera department, production and set-management since the age of 19 years old when I got my first job.
Films taught me adaptability, extreme punctuality and gave me very high work ethic.
I have enjoyed the diversity of different position on and off movie set. I am still curious to learn and develop more skills in the future. I can communicate fluently in English, French and German which enable me to work with many foreigner crews.
I have always been surrounded by the skateboard and snowboard culture and always tried to join my two passion together on more personal projects. I am available if you want to know more.
I recently took deep interest in marketing and how to bring a vision to the world and did my Google digital marketing certificate.
